Video Tips:

- 1) Make sure the area is well lit and the noise level is good for shooting
- 2) Careful to keep your finger off of the mic when shooting with a smartphone
- 3) Do more than one take
- 4) Video files like .mp4, .wmv and .mov are large, so keep it short to make emailing easy
- 5) Warm up your participant by asking them their name on camera and how to spell it (will make it easier for captions)
