

# PREDICT THE EFFECTS OF PRESCRIPTION DRUG ABUSE!

**Get interactive the old school way with the paper fortune teller!** It's a fun (and safe) way to discover the effects of prescription drug abuse. Just choose an activity, select a prescription drug, and voila! See the possible outcome for yourself. Check out the next page for a template to make your very own today. This low-tech guide is brought to you by the National Institute on Drug Abuse.

Disco Bowling	OxyContin nausea and vomiting lack of energy	Adderall headache and dizziness loss of coordination	School Dance
Halcion impaired memory disorientation			Xanax slurred speech lowered blood pressure
Vicodin drowsiness skin, lung, and brain abscesses			Percept inability to concentrate breathing problems
Big Test	Valium fatigue excessive sweating	Ritalin anxiety, paranoia, and aggression depression, respiratory	Hot Date

**Is this for real?** You bet. These side effects can happen when you abuse or misuse prescription drugs. Although not all of the side effects will happen to everyone, taking prescription drugs without a prescription or ignoring your doctor's instructions is dangerous. You never know what you're getting into.
